(57) **ABSTRACT**

Provided is a method of anticancer therapy comprising
administering to an individual an herbal extract-based com-
position comprising an extract of *Gynostemma*
pentaphyllum, an extract of *Crataegus pinnatifida* (hawthorn
leaves or berries), and an extract of *Camellia sinensis* (green
tea). In one embodiment, the anticancer therapy comprises
administering to a tumor bearing individual a therapeutically
effective amount of the composition. In a second
embodiment, the anticancer therapy comprises administer-
ing to an individual, at risk of developing a tumor, a
prophylactically effective amount of the composition.
